<169r>

pass there for seventeen or $2^s 8\frac{1}{2}^d$. $13\frac{6}{7}$

That the loss by the Exchange at Dunkirk is more the double to the that in Flanders

passes there for seventeen livres but is worth (Intrinsick value) nineteen Livres 13 sols which leaves a loss of two Livres thirteen sols, or $2^s 8^d$ sterling, whereas in landers the loss was but about twelve Stivers, or $1^s 2^d$ sterling (whereof about half was born by the Queen) as appears by the annexed computation.
