<319r>

To the Right Honourable the Lords Commissioners of her Maj^{ties} Treasury

May it please your Lordship

The time for making the Coronation Medals being very short I humbly pray your Lordships speedy Orders concerning them. The silver Medals may be 15^{dw^t} better then standard & a pound weight Troy divided into 22 medals The Gold may be 1^{car} 2^{gr} better & a pound weight Troy divided into 20 Medals. If a pound weight Troy of Gold were divided into eighteen Medals they would take the impression better, for the former gold Medals were too thin. The Gold will cost about 4. 6^s. per ounce & the silver about 5^s. 7^d. The Coynage Duty in the opinion of M^r Attorney General being not applicable to this service, other monies will be requisite.

All which is most humbly submitted &c

Isaac Newton
