lw<sup>t</sup>

Vpon the 24 <sup>th</sup> of March 1713 there was in the Mint uncoyned	82
From the 25 <sup>t</sup> of March 1713 to {the}25 <sup>t</sup> of March 1714 coyned	14331
From Mar 25 1714 to Mar 25 1715 coyned	29848
Total coyned from 25 Mar 1713 to 25 Mar 1715	44179 <sup>lw<sup>t</sup></sup> standard
which at 44 $\frac{1}{2}$ Guineas to the pound weight amounted to	1965965 $\frac{1}{2}$ Guineas
& at 21 <sup>s</sup> 6 <sup>d</sup> to the Guinea amounted to	2113412 <sup>li.</sup> 18 <sup>s.</sup> 3 <sup>d</sup>

Bulli{on now } in the Mint 25 Mar 1715 to be coind  
Which at 44 $\frac{1}{2}$  Guineas per pound weight will make  
And at 1<sup>li</sup> 1<sup>s</sup> 6<sup>d</sup>. per Guinea will make

The Gold moneys of forreign nations which come into England are melted down into Ingots by the Goldsmiths before they come to the Mint We can distinguish these Ingots from the Barrs which come from Lisbon, by their shape & by the {Goomes} of the Portugal Gold; but we do not enter the distinction in our books

After the Ingots of Gold are coyned, we have no other way of knowing by our books what {co}me from Portugal what from Iamaica & what from Spain France Ho{l}and & other places then by the Assay, the gold

coined out of Moyders being generally standard or a quarter of a grain better then standard, {th}at out of the new French money being a grain & for the most part a grain & a quarter wors then standard.

The silver coyned the last two years ending at Lady day 1715 amounts only to 3899<sup>l̄w<sup>t</sup></sup> standard. Which at 3<sup>li</sup> 2<sup>s</sup> to the pound weight makes 12086<sup>li</sup>. 18<sup>s</sup> in tale. This silver has been almost all of it got out of English lead by a company, incorporated for smelting of Lead Ore with pit coale & {illeg} the charges of wood. We know of forreign {illeg}

<Mint 19/2/126v>
